

CABLE GRIPS

The teeth are cut deeper to give a better grip.

TO FIT SIZES 1/4" - 1/2" AND 5/8" - 3/4"

- The ideal tool to grip the wire rope so it can be pulled, tugged, dragged, etc.—not used for overhead lifting.
- General use in wire rope distributor warehouses.
- In the field with construction crews wherever wire rope is used.
- In mines-coal-silver-copper used in conjunction with mining conveyors.

CODE NO.	ACCEPTS WIRE SIZE
1604-20L	.125 to .50
1625-20	.28 to .75

NOTE: Larger sizes and different styles available.

WIRE ROPE CUTTER

FAST: The cut is made in a matter of seconds. **SAFE:** All blades retained within the housing at moment of impact. **RUGGED:** Shock resistant, malleable iron casting and tool steel blades. **CLEAN CUTTING:** U shaped blades (both top and bottom) help rope keep its original shape. **PORTABLE:** Newly designed castings cut dead weight without impairing strength of housing. **LOWER COST** than hydraulic or shear type cutters of equal capacity. **QUICK FIELD REPAIRS** made using only a hammer and punch. **PAINT**—All units painted bright "Roadbuilders Equipment" Yellow. Government Spec. Numbers: GGG C 800, Type III, Sizes 1, 2 and 3. Stock #5110-293-1066.
